**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

- With regard to independent claims 19 and 25, as the closest reference on record Terunuma et al (US 5,936,812) discloses a thin film device in Fig. 2 including: at least one thin film layer, at least one component above; the component including central portion that projects generally upwardly from the thin film layer; the component being formed with an over head that includes overhang portion wherein the overhang portions projects generally laterally outward from the central portion and over the thin film layer; and wherein the overhang portion includes an outer edge thereof; a layer being disposed beneath the overhang portions; the layer being disposed within a volume defined by the thin film layer, the central portion of the component, the overhang portion; **but fails to show** that the layer is photoresist and a surface that is generally perpendicular to the thin film layer and which surface intersects the outer edge of the overhang portion.
- Applicant asserts: "the device is baked, such that hard baked resist remains beneath the overhang. Ultimately, the device is encapsulated and no voids or redeposition problems exist beneath the overhang due to the presence of the hard baked resist" (Specification, p. 3).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
